

Homeschooling classes for core subjects like English, Math, Science, and Civics offer a flexible and personalized approach to education. Here's a brief overview:

- **English:** Focuses on reading comprehension, writing skills, grammar, and literature. Students often engage in creative writing, essays, and book reports to enhance their language abilities.
- **Math:** Covers fundamental concepts such as arithmetic, algebra, geometry, and calculus. Lessons are tailored to the student's pace, ensuring a solid understanding of mathematical principles.
- **Science:** Includes subjects like biology, chemistry, physics, and earth science. Hands-on experiments and interactive activities help students grasp scientific concepts and develop critical thinking skills.
- **Civics:** Teaches about government, politics, and the rights and responsibilities of citizens. Students learn about the Constitution, the electoral process, and current events to become informed and active members of society.

Homeschooling allows for a customized curriculum that can adapt to the student's learning style and interests, providing a comprehensive and engaging educational experience.

Enhance Literacy Skills for Grades K-12

Yes! We use books and technology to maximize learning for the 21st century learner. We accommodate instruction for diverse learners. Your child benefits from individual or small group instruction. SAI offers reading individual or group class sessions for K-12 students each semester. During the class session, your scholar is challenged in reading, writing and critical and analytic thinking skills as we foster their learning with rigorous curriculum. We provide parent conferences and recommendations for at-home activities unique to their qualitative and quantitative data.

Math for Grades K-12

Watch your child's math skills soar! Our educators are equipped with all the tools you need for success. From math professors to professionals, our educators are experts in their fields. Our students report better grades and test scores after working with our educators.

SAT Prep for Post-secondary Learning

We assure you that our test taking strategies and resources will boost your score. Learn more college board link <https://www.collegeboard.org/>)

ACT Prep

Learn exam material and test-day techniques in class sessions with an SAI expert who will adjust to your needs in real-time, respond to your inquiries, and provide unique advice to boost your confidence and score. Learn more <https://www.act.org/content/act/en/products-and-services/the-act.html>

Tips on How Can I Facilitate My Child's Reading

For many parents, helping their children study at home may be a difficult task. This difficult task is especially true for people working from home or caring for many children at once. Being the adult assisting a child in their learning can be tricky since, for many, it has been a while since we have practiced reading, writing, mathematics, or remembering a scientific equation. Here are some tips to help you support literacy skills at home.

Tip #1 Understand the state learning standards.

Understanding the standards is critical, and you can still enhance your child's learning with supplementary materials. Florida Best Standards are the essential skills for each grade and are specific to each subject. Each standard builds upon the previous grade level and progresses to the next. It is beneficial for parents to understand the standard outcomes of the year level above and below their child's current level. Even though priority standards have been defined, it is expected that the curriculum in its entirety is taught.

Tip #2 Engaging your child in reading.

If your child periodically does not show an interest in reading, continue to read to your child as he plays quietly. Eventually, the child will again be eager to participate in reading.

Tip #3 Establish a clear routine.

Try to read each day (Find the time when you and your child are relaxed and interested in reading, such as at bedtime or after a nap), and let your child choose the books and how many pages he or she wants to read.

Tip #4 Follow the advice of your child's school.

Recognize your child's effort and stay positive. Follow the teacher's or school's advice.

Tip #5 Practice reading and writing together.

Looking at the letters while hearing them blended into words, listening to the language's flow, and considering the meaning of the text—can all be aided by having someone read aloud. Your child can summarize what they read or compose their own creative stories at home and read them to their family members.
